## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 45744 **Concern Info** There is a quarry that has a bad sulphur odor. The Odor was strong on April 13, 2021 and lighter on April 14, 2021. The od made it hard to breathe.

The CP contacted the Quarry but they would not tell them anything about the odor.

**Comments** No odor noted at time of site visit. Odor issue could not be confirmed during investigation.

|      |           |           |                  |                  |              |    |

| KCRO | 4/16/2021 | 4/15/2021 | Bent Tree Harbor | Warsaw<br>Benton | Open Burning | CK |
|------|-----------|-----------|------------------|------------------|--------------|----|

**Concern No.** 45763 **Concern Info** Old campers and other wastes are being hauled into the old quarry at Bent Tree Harbor and are being burned. When they burn, you can see the smoke from miles away. This has been an ongoing issue for some time. To quarry access is locked, indicating materials hauled in are either hauled in by the property owner / operator or with the owner / operator's permission.

**Comments** Upon the site investigation, the concern was verified by the HOA and the HOA was issued a Letter of Warning for burning and solid waste violations.

**Concern No.** 45836 **Concern Info** Strong smell of manure/Lagoon at the corner of NW 1971 Rd and 800

**Comments** I did not detect odors from the alleged source, but I did smell a slight odor from a small farm with cattle. The farm operation at the southeast corner of 1971 and 800 Roads is below a Class II operation. The odor was below the threshold, and the facility is exempt from the odor regulation. No odor violations. The farm operation at the SE Corner of 1971 and 800 road is below a Class II operation. The odor was below the threshold and the facility is exempt from the odor regulation. No odor violations.

Buchanan

**Concern No.** 45920    **Concern Info** EPA did a site visit April 26, 2021, to HPI's facilities and learned that a contractor had started to demolish at least some of the 424 S. 8th Street building. Past assessments indicated lead based paint, asbestos, and PCBs in the building. MoDNR sent a letter to HPI and City about demolishing with the regards to at least asbestos in 2020. We were not aware of demolition of the building and wanted to see if MoDNR was aware and if MoDNR is overseeing the demolition?

**Comments** Letters of Warning have been issued to HPI Products, Inc. / St. Joseph Properties, LLC and Dick Bowman for failure to submit a demolition notification

**Concern No.** 45899    **Concern Info** We had odors throughout the area, depending on direction of wind, from April 30 to May 3. There was a DNR employee in area on Friday that witnessed the odor we speak of. Saturday, May 1, I tried to mow at 1886 NW 800 Road. The odor was pretty strong. We have been told ZMDR is working on the odor, but it appears to be worse. The odor traveled down 1901 Road. Last night we were trying to work on a lawnmower in the shop at 800 and 1971 Road, strong odors there and that w around 6-8

**Comments** Odors have been present, but not strong enough to be in violation. Surveillance will continue.

**Concern No.** 46093 **Concern Info** Demolition of commercial structures that no notification was made

**Comments** A report with Unsatisfactory Findings was issued to the owner, Love's Travel Stops & Country Stores, and the operator, REMCO Demolition, LLC, for failure to submit a demolition notification at least 10 working days prior to demolition of all regulated structures.

The demolition contractor submitted notification on May 24, 2021. The notification included an asbestos inspection, which indicated no asbestos-containing materials were found. The remaining project appears to comply with the Department's asbestos regulations, including inspection and notification requirements. Therefore, the project has returned to compliance.

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region            | Investigation Date | Date Received | Suspected Source Owner/Operator   | City/County          | Type of Concern                      | Inspector Initials | NOV | RNOV |
|-------------------|--------------------|---------------|---|----------------------|--------------------------------------|--------------------|-----|------|
| Concern No. 46165 |                    |               | <b>Concern Info</b> On Friday, June, 4, 2021, in the late afternoon, the concerned party observed a large amount of dust being generated from the dragging of the ballfield. Concerned party states that the issue has been much better for the last few years, but the individual doing the dragging has been gradually creating more dust. On Friday, it appears the individual did not put down water when dragging.   |                      |                                      |                    |     |      |
| Comments          |                    |               | An onsite investigation was not conducted. The city was contacted and advised to ensure control measures are in place to minimize dust. The concerned party will advise the Department if the situation does not improve. If the situation continues, an onsite investigation may become necessary  |                      |                                      |                    |     |      |

**Concern No.** 46278    **Concern Info** They are tearing down an old hotel at 291 and 24 highway. And just dumping it behind a business at 1203 e us highway 24 And pushing it off on the woods with a bulldozer. I am unable to locate who owns it. I know it is a property management company leasing the building, and it is hickory farms trucking in the old hotel. They are bringing in roughly 20 loads a day. And trying to hide it by pushing it in the woods, you can see the debri sticking up over the hill from 24 highway. That hotel was old, full of roaches and bed bugs. And most likely asbestos. I know someone who lives in the area, that property. Has lots of wild life and natural springs

**Comments** An LOW is being issued for failure to notify (Air Pollution, Asbestos), illegal dumping (Solid Waste) and failure to determine the paint waste (Hazardou Waste). See report for details.

**April 16, 2021 and June 15, 2021**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46214    **Concern Info** House fire occurred some time ago at 8511 NE Hurlingen Road; St. Joseph. Owners have since moved into town and are allowing someone to stay on the property in an RV. The occupant is cleaning up the property in lieu of rent. The occupant has built a burn pile and has been burning the debris.

Occupant also thought he was going to get into the used tire business, so hundreds of tires have shown up. However, Planning and Zoning will not allow selling of tires under the current zoning of the property.

**Comments** The open burning concern could not be verified at the time of investigation. Photos provided by Code Enforcement of burning wire were taken by the neighbors. Responsible parties were informed of the open burning regulations. Further investigation will be conducted if additional concerns are received.

|------|-----------|-----------|--------------|---------------------|------------------------------|----|

**Concern No.** 46210    **Concern Info** Caller states that Larry Marble has been burning lumber and an old shed that was falling down. She stated that there is a toxic smell and smoke and she can't go outside because of it. Caller called yesterday to report this also and also contacted the fire department. She said the fire department did not put the fire out because it had already burned down, but he added more stuff as soon as the fire department left. She said the fire is still smoldering. The caller also stated that there are dumping and trash issues on the property. She wanted to additionally provide a possible phone number for Larry Marble that she had found online - she thinks it may be 86-690-8011.

**Comments** Violations of the Missouri Air Conservation Law and Regulations were observed on June 2 and 9, 2021. A report is being written with these, along with additional violations of the Missouri Solid Waste Law and Regulations included. The report will be sent to the concerned party for resolution.

|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46218    **Concern Info** Ted Martin, the City Engineer, from the City of Harrisonville called about a possible dumping on their property next to the lake that supplies their drinking water for the City. The lake is Harrisonville City Lake. A fisherman had seen someone on the City's property recently possibly dumping by the lake. He asked about what they were doing and he was cussed-out. The fisherman contacted the Mayor and the Mayor contacted staff on Saturday. Ted Martin explained that there is a trail from the Cassandra sport horses property shown on Google Maps (and on this form) that leads to what appears to be a dump of some sort and potential burn site. Mr. Martin would like someone to contact him and set up an investigation date/ time when DNR and the City could boat across the lake because it is generally not accessible via their property otherwise and investigate the matter.

**Comments** The City of Harrisonville is currently working on the issue to determine if anything has been buried and to inform them that the area in question might be property belonging to the city.

|      |           |           |                      |                       |      |    |          |

| NERO | 4/27/2021 | 4/19/2021 | Eagle Ridge Landfill | Bowling Green<br>Pike | Odor | RD | NE210021 |
|------|-----------|-----------|----------------------|-----------------------|------|----|----------|

**Concern No.** 45844    **Concern Info** Just to let you know the landfill still smells everyday and evening and on weekends they are not covering it. This past weekend it smelled 10x worse than when you were here. It was a sour smell and would gag you when you went out

**Comments** Arrived at Eagle Ridge investigation site on April 27, 2021, at 10:16 a.m. Upon arrival I noticed odors starting at the landfill entrance and going 0.25 miles north on highway VV. I stopped at the Jennings residence to conduct the investigation behind their house and recorded the following. At 10:50 a.m. I recorded a 7:1 violation. I left the odor stream and returned 15 minutes later. At 11:14 a.m. I recorded a 7:1 violation. I talked to Carolyn Jennings the property owner and explained to her that I had found an odor violation at the 7:1 threshold. I informed Rodger Smith landfill manager, that I had found odor violation at the 7:1 threshold. Rodger and I came to the conclusion that the odors must be coming from the working face and that the complaints are probably because the working face is too close to the neighboring residence. Rodger said that he didn't know what to do about the smell coming from the working face, but thinks once they finish working in that area and move to a different location in the landfill that the odor would go away.

|------|-----------|-----------|-----------------------|------------------|--------------|----|

**Concern No.** 45823    **Concern Info** Caller states that Robert Doty is burning railroad ties. The responsible party told the Saline County Sheriff's Office that he spoke with the railroad and they gave him permission to burn the railroad ties. He told the sheriff's office that the railroad ties are old, so the creosote is no longer present in the railroad ties. Railroad ties have been there for 15 years. Deputy stated that they are burning approximately 40-50 ties at one time. The caller stated that Robert Doty has a large number of railroad ties at the site and he intends to burn all of them.

**Comments** On April, 23, 2021 an open burning investigation was conducted. Some burning of railroad ties was found to have occurred. The responsible party agreed to extinguish the smoldering railroad ties, dispose of the ash and other burned items on the property at a landfill. A Letter of Warning is being issued a 30 days given to respond with a cleanup.

| <b>Concern No.</b> 45880 <b>Concern Info</b> Caller reports that the asphalt plant in Brookfield that was previously reported is putting out significant emissions. Caller reports that there is dust all over the cars in the parking lot and a staff member had to go home unable to breathe (this staff member had previously had COVID). Caller states the asphalt plant is causing her eyes to burn and also causing her to cough. Caller states she has previously discussed a concern with this plant with Steve during the winter. |                    |               |                                    |                    |                             |                    |     |      |
| <b>Comments</b> On 4/30/21 ESS plant manager Jon Brown called to give a report on their check of the baghouse from this morning. He said that they had opened up baghouse and found about 6 bags that had fallen down and were laying in the bottom of the baghouse and they had found 4 or 5 others that did not have the tops snapped in securely. Those were all fixed. He said that they have noticed an improvement in the performance of the baghouse already today  |                    |               |                                    |                    |                             |                    |     |      |

|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 45967    **Concern Info** On May 13, 2021, Dean McAdams called NERO to report an environmental concern alleging fugitive emissions and strong asphalt odors were coming from the Emery Sapp & Sons (PORT 0441) asphalt plant. Emissions coming from the ESS asphalt plant have caused him breathing trouble over the past couple weeks.

**Comments** Emissions such as fugitive dust from the haul roads and stock piles were visible, but were not causing a violation at the time of the investigation. Upon observing the baghouse minimal emissions from the bag house were noted and seemed that it was operating correctly. We talked to ESS plant manager Andy Baker and mentioned that he needed to water his lot more frequently.

|------|-----------|-----------|-------------------------------|--------------------|-----------------------------|----|

**Concern No.** 45968    **Concern Info** Caller reports the asphalt plant in Brookfield that has previously been reported is continuing to cause air pollution issues. Caller states that it is not as bad, but she still has staff with headaches and coughing and one individual has to leave sometimes due to breathing difficulty.

**Comments** We parked next to the ESS asphalt plant and watched it operate for about 20 minutes. Emissions such as fugitive dust from the haul roads and stock piles were visible, but were not causing a violation at the time of the investigation. Upon observing the baghouse minimal emissions from the bag house were noted and seemed that it was operating correctly. We talked with ESS plant manager Randy Baker and mentioned it would be a good idea to start watering the lot more frequently.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County        | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|--------------------|-----------------|--------------------|-----|------|
| NERO   | 5/25/2021          | 5/24/2021     | Emery Sapp and Sons (Port 0441) | Brookfield<br>Linn | Odor            | RD                 |     |      |

**Concern No.** 46096    **Concern Info** The caller reports that an employee at SB40 is reporting health issues due to odors from the asphalt plant this morning. The caller was working out in the greenhouse. This is an employee that has not reported issues previously. There is a lot of smoke from the plant this morning.

**Comments** I determined that Emery Sapp and Sons (Port 0441) asphalt plant was operating in compliance and the only recommendation that could be made was to water the haul roads more frequently.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region            | Investigation Date   | Date Received  | Suspected Source Owner/Operator | City/County           | Type of Concern      | Inspector Initials | NOV | RNOV |
|-------------------|--|--|---------------------------------|-----------------------|----------------------|--------------------|-----|------|
| Concern No. 46464 | Concern Info   | Caller reported that on Wednesday (May 26) around 2 p.m., he was driving by the quarry on the east side of I-35 on the no side of Bethany (I believe this is Norris's North Bethany Quarry, 081-0017). He said the quarry was emitting a lot of dust (h described it as appearing like a snow storm. |                                 |                       |                      |                    |     |      |
| Comments          | No on-site investigation conducted. An unannounced inspection will be conducted to evaluate compliance.  |  |                                 |                       |                      |                    |     |      |
| NERO              | 6/9/2021   | 6/3/2021   | Doyle Property                  | Curryville<br>Pike    | Open Dumps: Roadside | BH                 |     |      |
| Concern No. 46193 | Concern Info   | Web form states: "Open dumping at roadside, extensive enough to be visible on aerial photography (Google Maps)."   |                                 |                       |                      |                    |     |      |
| Comments          | Violations of the Missouri Solid Waste Management Law and Regulations, and Air Conservation Commission Regulations, were determined. At the time of the investigation, it was determined that Steven Doyle had dumped, or allowed the dumping of, approximately 280 cubic yards of regulated solid waste consisting of furniture, scrap tires, vinyl flooring, carpeting, scrap lumber and wood, insulation, brush, household/residential waste, children's toys, mattresses, and other miscellaneous wastes onto the surface of the ground. Additionally, burn residue and the partially burnt remains of regulated waste was observed in the pile. A Letter of Warning will be issued to Stephen Doyle requiring the removal and proper disposal of the observed waste and burn residue, and the submittal of photographs and disposal receipts documenting the proper disposal. |  |                                 |                       |                      |                    |     |      |

**Concern No.** 46350    **Concern Info** Caller is reporting a strong odor from toxic burning of materials. Caller stated that strong odor is going into a residential area. Caller stated that this had been going on all weekend. The source and responsible party is unknown.

**Comments** On 6/4/21, I, Ryan Dawson contacted Sedalia City Fire Department to discuss an open burning concern located around the area of 3600 South Grand, Sedalia, Mo. The City Fire Department said they would send a unit to the reported address to check out the concern. I gave them my name and contact information and was told they would call me back if they found anything after they investigated the matter.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46186 **Concern Info** Early in 2021, I reported an Asbestos issue concerning a burnt out residential property that has been burned out for over 2 years. I reported this anonymously, to the best of my knowledge, DNR never followed up or took any action. Now I have Health Issues and I want action taken. What are my options? Call me, Bill Heisserer. 660-341-6115.

**Comments** No evidence was found to show that a previous report has been made by the concerned party. No violation is being alleged. A house burned a house August to September 2018, but was apparently set by vandals. The Fire Department responded and put out the fire. Concerned party is now asking the owner be required to remove asbestos and properly demolish and dispose of the house debris from the partially standing structure. Provided fact sheets and responded to concerned party by email.

|------|----------|----------|------------------|----------------|--------------|----|--|--|

**Concern No.** 46217 **Concern Info** Caller reports materials such as construction demolition waste, mattresses, appliances, asbestos containing materials and other hazardous materials actively being burned at 7784 Hwy 168 Palmyra Mo. The caller reports that the owner of the property is Urban Wiskerchen and the burning has been going on since Friday June 4th.

**Comments** During the investigation I noticed 3, possibly 4 piles of burnt demolition waste, several burnt household items such as mattresses, appliances and other household items. There was a trailer on site that had scrap metal and other items that came from the property / house that had been burned. On June 10, 2021 I made contact over the phone with Urban Wiskerchen. I informed Urban that I had been out to his property located at 7784 Hwy 168, Palmy Mo and found items burnt that violated Missouri open burning rules.

**Concern No.** 46202 **Concern Info** The smell of dead animals and animal waste is horrible! It literally will take your breath away.

**Comments** On June, 11, 2021, I, Ryan Dawson conducted an odor investigation downwind from CE Grain Company, LLC. At 10:27 a.m. odors were detected using Nasal Ranger field olfactometry instrument at a 7:1 Dilution to Threshold level on Highway 54. At 10:48 a.m. odors were again checked with a Nasal Ranger and found at a 7:1 Dilution to Threshold level.

**Concern No.** 45850    **Concern Info** SP:29088  
 CP states the RP is burning tires, wire, shingles and other trash on the property. CP is concerned with fumes. CP states you can call them if you have any trouble finding this concern.

**Comments** At the time of this investigation, I spoke mostly to Stephanie Newkirk but Carl Newkirk was available. Stephanie Newkirk stated that an auction business is being operated at this location. Items are recovered from storage lockers and are sold online. Items that cannot be sold are donated to charity via a yellow box. Scrap metal goes to a scrapyard either in Park Hills or Bloomsdale depending upon who is paying more. Wastes including scrap tires go to a Transfer Station in Park Hills.

Stephanie Newkirk stated that only residential wastes (or household trash) are disposed of by open burning.

I left my business card, fact sheets including Management of Scrap Tires, Managing Construction and Demolition Wastes, Facts on Open Burning Under Missouri Regulations, and a copy of the air regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements.

 CP states the RP is burning tires, wire, shingles and other trash on the property. CP is concerned with fumes. CP states you can call them if you have any trouble finding this concern.

**Comments** I arrived at the designated concern location. No one appeared to be on site at the time of my visit and no open burning appeared to be occurring. A letter asking to make contact with us is being mailed out, as well as fact sheets on open burning, managing residential waste, and managing recovered materials.

Todd Raney, environmental supervisor APCP, left a message with the concerned party on 04/26/2021.

Monthly Air Pollution Control Program Detail Report

**Concern No.** 46006    **Concern Info** SP:29136

Extreme odor coming from Timber Ridge Landfill in Richwoods MO. The CP stated she can not sit outside because of it and can smell it in her home. She lives about a mile and a half from the landfill.

**Comments** The concern was investigated on April 27, 2021. An attempt was made to make contact with the concerned party, however, a flooded low water crossing w/ a "Road Closed High Water" and absence of a contact information such as a phone number prevented me from making contact with Ms. Nickelson

With no further information to go on, I proceeded to check for odors coming from Timber Ridge Landfill. No odors had been detected along Highway H the way to the CP. Following the attempt to make contact I proceeded north on Highway WW up to Highway 30/Gravois Road, Turned west and followed Highway 30 until I turned left onto Highway FF heading south. to Highway 47 and continued south on Highway 47 until I made it back to Highway H. The drive was made slowly with the windows down. Wind was blowing from the south.

No odor was detected at the time of the investigation at the low water crossing just down the road from the provided address for the source of the concern. No landfill odors were detected during the investigation. The scent of horses was detected along Highway 30/Gravois Road.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46060 **Concern Info** SP:29163  
?Caller reports that the Prairie Valley Landfill and nearby asphalt plant located at Voss Quarry are emitting odors that permeate his home.

The caller is sure that these two sources need stricter air pollution requirements.

**Comments** On both April 28, 2021, and May 5, 2021, odor surveillance was conducted in the area around these two facilities. On April 28, 2021, odor surveillance was conducted from 8:09 a.m. to 10:16 a.m. The weather was rainy with a temperature of 69 degrees Fahrenheit and wind from the SSW at 7 miles per hour. The asphalt plant was open but did not appear to be in operation. There were no odors noted from Prairie Valley Landfill or from the Capital Materials Cuba Asphalt Plant.

On May 5, 2021, odor surveillance was conducted from 8:05 a.m. to 10:38 a.m. The weather was sunny with temperatures ranging from 53 degrees Fahrenheit to 57 degrees Fahrenheit and from the north at 5 to 6 miles per hour. There were no odors noted from the Prairie Valley Landfill and only a faint, intermittent odor from the Capital Materials Cuba Asphalt Plant. Because of the faintness of the odor and especially because of the intermittent nature of the odor from the asphalt plant, an odor evaluation with the Nasal Ranger was not attempted.

Steven Wherry, Operations Manager at Prairie Valley Landfill, was contacted by telephone on May 10, 2021, and stated that there had been no unusual operations or malfunction around the time when this odor concern was received on April 22, 2021. Steven Wherry stated that the landfill opened up a cell for use around this time; but otherwise there had been nothing unusual. Nathan Pitts, Supervisor for Capital Materials' Cuba Asphalt Plant was contacted by telephone on May 10, 2021. Nathan Pitts stated that the asphalt plant had not experienced any unusual operations or malfunction around April 22, 2021. Nathan Pitts further stated that production was down so far for this year. The Asphalt Plant is well under its operating limits (see air construction permit number 072019-008) per Nathan Pitts.

**Concern No.** 46412 **Concern Info** SP:29174  
Mr. Pretz,

I would also like to thank you for your work on the trash dumping issue at 12225 County Road 3290. I wanted to add some things to Lindas email from yesterday. The tenant is Shawn Micheal White and according to his facebook page he cleans rental properties for money. I saw him leaving yesterday morning in the white truck that dumped trash on the pile with another gentleman driving.

On top of the new trash continuing to be added, Shawn has been burning on the trash pile frequently since your agencies visit a few weeks ago. I am unsure what is in the trash pile but it has a horrible smell when it is burning and it will smolder for quite some time when it burns. Below are some photos of the trash pile burning, the new trash, and the white truck referenced.

Please let me know if there is anything I can do or if you have any questions.

Thanks again,  
James Kolbe

**Comments** ?This investigation was conducted in the field on both April 28, 2021, and on May 5, 2021. No open burning was observed on either date. There are several Private Property signs posted on site. The alleged Responsible Party was contacted through the mail. A telephone number was not located. The Property Owner, Mary E. Pobanz, was also reached earlier by correspondence.

If additional environmental concerns are made to this office, additional efforts to reach the responsible party in person or by telephone will be made.

**Concern No.** 46063 **Concern Info** SP:29183

RP is burning treated wood that has been painted. He has also previously burned mattress, recliner, box springs, swimming pool liners. CP has went to the Salem Police Department, Alderman and the Mayor with no luck.

CP has spoken to the owner of the house and said the owner was trying to get RP evicted from residence.

**Comments** ?At the time of my investigation, it was raining and no open burning was taking place. There was some apparently untreated wood waste on site. Jessica Bartlett stated that the material was generated at other sites and brought to this location for disposal by open burning. No construction activity had occurred at this location. I informed Jessica Bartlett that hauling material to this location for open burning was a violation and that the activity needs to cease. Jessica Bartlett agreed that open burning would cease.

10 CSR 10-6.045 Open Burning Requirements permits open burning of untreated wood waste generated from the trade waste or construction and demolition waste only when the open burning complies with conditions such as at least 200 yards from the nearest structure not owned by the party conducting the burning unless an air curtain incinerator is used. In this instance, the property involved is a rental property and one of the closest (much less than 200 yards) neighbors is the CP. The Property Owner, Deloris Wood, has not given permission to open burn at this location; but has instead taken the Responsible Parties, her renters, to court.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46062    **Concern Info** SP:29229  
Doctor's Car (a business located in Thayer, MO) is setting oil jugs on fire and the oil seeps into the ground and into the ponds.

**Comments** At the time of the investigation, no open burning was noted. I spoke with Corey Godwin who is the owner of the Car Doctor, which is an auto repair and maintenance shop. Corey Godwin stated that new oil is purchased in bulk for the Car Doctor. Used oil is burned in a used oil-fired furnace for space heating in the shop. The facility has open burned cardboard and paper that were generated from the business and are considered a trade waste. I informed Corey Godwin that the open burning of most tradewastes are disallowed under 10 Code of State Regulations 10-6.045 Open Burning Requirements at section (3)(A)3. I left my business card and the fact sheets Facts on Open Burning Under Missouri Regulations, Used Oil Contaminated Waste, Antifreeze Waste Management Guide, Management of Scrap Tires and a copy of the open burning regulation 10 CSR 10-6.045 Open Burning Requirements. Corey Godwin stated that they were unaware of the prohibition against open burning of tradewaste and would get a dumpster in for waste pick up and will clean up the open burn area.

**Concern No.** 45990    **Concern Info** SP:29270  
RP owns a tree service business and hauls in tree's, stumps, and other debris and burns on property. CP unsure of name business or owner.

**Comments** This environmental concern is a repeat of one investigated earlier with no new information and an anonymous concerned party. No open burning was occurring on May 6, 2021; but the site did have evidence of the open burning and storing of vegetative waste. I spoke with Carlos Escobar, by telephone on April 12, 2021, who stated that the open burning is not within 200 yards, occurs between sunrise and sunset, is less than 80 cubic yards per week, etc. as required by the 10 Code of State Regulations 10-6.045 Open Burning Requirements. Carlos Escobar further stated that this location had been used for open burning for about 20 years. I discussed the requirements of 10 CSR 10-6.045 Open Burning Requirements with Carlos Escobar. I offered to answer Carlos Escobar's questions and the fact sheet Facts on Open Burning Under Missouri Regulations and a copy of the regulation 10 CSR 10-6.045 Open Burning Requirements were mailed to Carlos Escobar.

**Concern No.** 46354    **Concern Info** SP: 29289

This problem has existed for several months. I want it stopped. From the hours of 9pm till 7, or 8, am most days I cannot breathe outside due to caustic emissions coming from Potosi Charcoal.

I expect that baghouses are not being maintained or environmental shortcuts are being taken and placing the health and well being of myself and relatives and loved ones at risk. I expect it to be stopped. Any assistance in rectifying these violations of my clean air that I have a right to, would be appreciated.

I expect an answer on what has been done to correct this obvious violation of my clean air at the following address.

Eric S Stroupe  
Disabled American Veteran  
10435 Wicket Road  
Cadet, Mo. 63630

**Comments** ?At the time of my investigation, one of the kilns was observed to be leaking smoke and other visible emissions. The instantaneous temperature reading for the afterburner was fluctuating and did not appear to be accurate. These are violations of 10 Code of State Regulations 10-6.060 Construction Per Required and of 10 Code of State Regulations 10-6.330 Restriction of Emissions From Batch-Type Charcoal Kilns that need to be corrected. A Letter of Warning was issued to officially document the problems and to encourage the facility to correct them.

|-------------|---|--------------|----------|---|--|--|--|--|
| Concern No. | 46417   | Concern Info | SP:29348 | Anonymous caller is concerned about continual odors associated with Prairie Valley Landfill and nearby asphalt plant located at Voss Quarry in Crawford County. Caller wanted to make sure that the batch plant at the quarry is investigated during operation. |  |  |  |  |
|             |   |              |          | Caller is concerned about odors associated with the Prairie Valley Landfill due to solid waste not being covered up properly during operations.   |  |  |  |  |
|             |   |              |          | Caller is concerned about water quality concerns (contaminants) from the Prairie Valley Landfill, Voss Quarry, and nearby asphalt plant located at quarry.  |  |  |  |  |
| Comments    | This investigation took place in the afternoon from 12:57 pm to 2:01 pm. The weather was sunny with a temperature range from 63 degrees Fahrenheit to 64 degrees Fahrenheit. The wind was from the East of Northeast (ENE) at 7 miles per hour. At the time of my investigation, no odors were noted from Prairie Valley Landfill. I spoke with Steven Wherry of Prairie Valley Landfill on May 10, 2021, as part of my earlier odor investigation and he stated that unusual activity was occurring at that time. The Capital Materials asphalt plant did not appear to be in operation only the quarry. I spoke with Nathan Pitts of Capital Materials on May 10, 2021, and Nathan Pitts stated that this plant produces approximately 20-25,000 tons annually. Since the plant is rated at 300 tons per hour and 25,000 tons divided by 300 tons per hour is 83.33 hours of annual operation (there are 8,760 hours in a year), the hot asphalt batch plant can be expected to be in operation, only rarely. Unless there is an odor problem when the plant is not in operation, it is unlikely that this asphalt plant will be found in non-compliance from a statistical standpoint. |              |          |   |  |  |  |  |

Timber Ridge Landfill

From the CP: "The smell is ridiculous and I can smell it inside my house. It normally is always on a Saturday or Sunday outside of normal week hours. I'm not sure what else to do about this. I have gone over by other landfills and you don't smell anything. Not sure if there is something else they can do to control this."

**Comments** The concern was investigated on May 19, 2021. With no indication as to an exact location of concern, I proceeded to check for odors coming from Timber Ridge Landfill. I surveyed for odors along public right of ways starting from the intersection of Highway A, Highway H and Highway 47. I proceeded north on Highway 47 to Hwy FF which I followed to Highway 30/Gravois Road, turned east and followed Highway 30 to Highway Y where I turned south and followed Highway Y until I made a right onto Highway WW. I followed Highway WW south to Highway H where I turned right to head to Timber Ridge Landfill.

I stopped in and spoke with Mr. Kevin Gentry, Site Manager to inquire as to any circumstances that could have resulted in an odor. Mr. Gentry stated issues had occurred which would be expected to release an odor any greater than normal.

Mr Gentry updated me on the status of action that Timber Ridge Landfill are taking to attempt to address concerns. Additional gas wells are being installed and a third party has been hired to check for odors three times a week.

After leaving Timber Ridge Landfill I proceeded west along Highway H to its intersection with Highway 47. This survey was made slowly with the windows down from the vehicle.

No landfill odors were detected during the investigation. The scent of fresh cut grass was detected occasionally along the entire route. The smell of manure was detected near Grubville.

 Construction work that damaged old sewage pipes and set off a sewage odor and there is emissions going into a home no  
 They built a large apartment building.  
 Unable to sell the house because of the sewage odor. The smell is also making the CP sick.

**Comments** I telephoned the concerned party, Nancy Toce, and I explained that the state odor rule (10 Code of State Regulations 10- 10-6.165 Restriction of Emission of Odors) regulates ambient air rather than indoor air quality. Additionally, the Missouri Department of Natural Resources' Air Pollution Control Program regulates facilities that emit criteria air pollutants and so far there is not a facility that has been found to be involved in this situation. I inform the concerned party that if a facility was found to be possibly or even partially responsible for this problem then we would investigate.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46396 **Concern Info** SP:29602  
CP states they believe the neighbors are burning tires near them. CP can see black smoke and can smell an odor like burning rubber. CP states the neighbors have seen truck loads of tires going back to the property where the smoke is coming from. CP states all the tires are sitting on the ground and being burned and they are concerned with the smoke and things leeching into the soil.

**Comments** ?At the time of the investigation no open burning or evidence of open burning was observed. Unfortunately, in this area of St. Francois County there are properties posted with No Trespassing signs and roads posted as Private Roads. This makes open burning investigations much more difficult, since it may be difficult to view all or most of a property or to drive by a property while looking for evidence of open burning.

Additionally, concerned Parties do not always have information that would assist this office with making contact and communicating with the responsible party.

The fact sheets Management of Scrap Tires, Managing Construction and Demolition Wastes, Facts on Open Burning Under Missouri Regulations, a copy of the rule 10 Code of State Regulations 10-6.045 Open Burning Requirements, and my business card were mailed to Harold and Fay Lewis as Responsible Parties.

|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46392 **Concern Info** SP:29624  
Michael Emory (Responsible party) has been reported as tearing down houses and burning shingles and other waste from the houses. He has also been reported as burning materials from cars out of a salvage yard. Leslie Myrick (mayor of Holland) was the gentleman I spoke with. When I asked for Mr. Emory's contact info he stated that he has already given it to Todd. I looked on a previous concern form and it looks like Mr. Emory's phone number is (573) 922-7695 and the listed address for him is 363 East 4th Street, Holland, MO 63853. There was a salvage yard on the previous concern form as well, Steve's Auto Sales and Henley Rentals, with an address of 4688 US HW 61, Steele, MO 63877.

**Comments** At the time of this investigation, no open burning was occurring. There was no one on site. This property is posted with no trespassing signs. I telephoned Michael Emory on June 29, 2021, and Michael Emory reiterated that scrap tires are not being open burned at this location. I asked what is being open burned at this location. Michael Emory stated that vegetative waste and some untreated wood waste have been open burned at this site in conjunction with a demolition business and a tree trimming business also operated by Michael Emory.

| SERO | 6/11/2021 | 6/11/2021 | Thomas Durbin | Poplar Bluff<br>Butler | Open Burning | TR |
|------|-----------|-----------|---------------|------------------------|--------------|----|

**Concern No.** 46394 **Concern Info** SP:29680  
The neighbor is burning something that is letting off a pugnant odor.

**Comments** At the time of my investigation, the fire appeared to be nearly out. There was a pile of mostly vegetative yard waste remaining with a little smoke left coming from a smoldering fire. I interviewed Thomas Durbin, who resides at this location. Thomas Durbin stated that he understood that it was okay to open burn anything at this location. I explained the regulation briefly. While the burning of household trash is permitted, things like petroleum-based materials including tires, asphalt roofing material, carpet, and used oils are not to be open burned per the state regulation. I left my business card, the fact sheet Facts on Open Burning Under Missouri Regulations, the fact sheet Managing Construction and Demolition Waste, and the regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements. Thomas Durbin stated that at 84 years of age it has now become very difficult to understand telephone conversations.

|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46348    **Concern Info** Sandy from Lincoln County Health Department called WPC and left voice mail regarding a concern that they received. Melissa Campbell lives in an apartment in Troy Missouri. Her neighbor builds furniture and stains it. She told Lincoln County Health Department that she is worried about her health from these fumes from the stain.

**Comments** I called Ms. Campbell and after speaking with the concerned party, I researched State of Missouri and EPA Lead Laws and fact sheets/safe practice guidance; antique furniture background and what the staining and paint may contain; littering statutes; 10 CSR 10-6.170, "Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin;" and review 10 CSR 10-6.061, "Construction Permit Exemptions" regarding the staining and sanding of furniture within the property.

I then called Ms. Kaleigh Marawofsky, the manager of the apartment complex, informed her of the concern, and asked her about the situation. I first asked about the apartment location from the edge of the complex property boundary, to which she replied that the boundary is approximately twenty feet away from the source of the concern. I then asked if she was aware of the situation with the neighbor, to which Ms. Marawofsky replied that there is a feud between a woman and several of her neighbors. I asked about Charles, the source of the concern in question, and she stated that he is in his eighties and she has not had any issues with his furniture rehab, except for the complaints from one particular neighbor. She inferred that the concern was submitted by Ms. Melissa Campbell stated that this particular neighbor has been an issue for the apartment complex and a handful of neighbors have been having issues with her harassing them. I then requested Charles' number to contact him directly to which Ms. Marawofsky then provided me the number of his daughter, Amy Detmer.

I called Ms. Detmer at 4:10 pm, May 13, 2021 and explained my reason for calling. I then asked questions regarding her father's sanding and staining operations. Ms. Detmer replied that her father is in his eighties and is working little by little on a gift for his granddaughters. Because of the complaints and hour restrictions, he has been working on the furniture approximately twice a week for a half an hour to an hour for each occurrence. I asked if he had any plans to sell furniture, to which Ms. Detmer replied that he did not and the furniture rehabilitation is a hobby of his. I summarized 10 CSR 10-6.170 and asked that she make sure that the particulates/fugitive dust did not leave the property. I then mentioned there might be lead in the old paint and asked that she speak with her father regarding wearing PPE for his health and to control the dust. She agreed and expressed her frustrations about the call, stating that she believed the concerned party is harassing her father and has submitted other concerns to the manager. I then left my name and number for her to contact me and disconnected the call.

I then called Ms. Campbell and explained the research I conducted regarding the concern and that there wasn't much I could do. I suggested that if the practice bothered her, it could be handled as a nuisance concern with the county. She thanked me for responding and we hung up the call.

**Concern No.** 46339    **Concern Info** Hello, my name is Mitchell Cooper. I live at 4212 Maple Tree Ct, Imperial, MO 63052. I would like to inform the fire department that my neighbor at 4215 Elmwood Court, Imperial, MO 63052 regularly violates the DNR burn regulations by burning all types of items. At the time of this email, they are currently burning a couch or sofa in their backyard. I would greatly appreciate it if something could be done about this situation especially since the smoke comes directly into our property and prevents us from using our backyard. Thank you. I can be contacted via this email address or at 314-330-454

Very Respectfully,  
Mitchell Cooper  
4212 Maple Tree Ct, Imperial, MO 63052  
314-330-4545

**Comments** I spoke with Mr. Cooper about his open burning concern. I cleared up that in his email where it states that he would like to notify the fire department, it was the same email he sent to the fire department. He still had not heard back from the fire department. I shared with Mr. Cooper that Jefferson County Division of Solid waste prohibits solid waste disposal by open burning and gave him their phone number. I encouraged him to contact DNR if the issue persists after Jefferson County takes action.

**Concern No.** 46340    **Concern Info** Extreme amount of dust purposely kicked up by privately owned street sweeper , pictures and video available , This is located in Lombardo homes Amberleigh subdivision which has just started building homes , We have been patient for 2+ years of excavation , I have peacefully ask them not to clean there streets in this matter do to health concerns in which the answered , the DNR doesn't want them to use water trucks because of silt going into the creek , is this accurate ? They do have socks in front of there sewers to catch the silt and they do drain into catch basins except for one that drains to the back of my property which collects there because of no place to drain (it's basically a hole) . I'm asking is this story about water trucks true , also what can I do to stop this air pollution of dirt and concrete dust making it impossible to go outside for hours at times and covering everything in this dust .

**Comments** I visited the site on May 5, 2021. First I went to the display house used as a temporary office. There was no one at the time of my visit. I walked around inside the construction site. There were workers and some vehicle activities on site. No dust on site or around the site at the time of my visit. Larry Weygandt's house (the caller) at 1432 Diehr Road is located adjacent to the construction site at the east side of the site. I walked to the house to talk to him. There was a "no trespassing" sign at the entrance to this house. I called his number and left a message. He called me back on May 13, 2021 at about 10:15 a.m. I explained to him that I did not see dust from the construction site at the time of my visit. I also told him that I called Lombardo homes and left a message letting Lombardo Homes Company know that they must take measures to make sure that dust originating from the construction site is not migrating beyond the property line. The caller was happy that we came out to address his concern. I encouraged him to call us for dust or for any environmental concern he may have.

**Concern No.** 46342    **Concern Info** Anonymous caller wished to report that their neighbor was open burning in their backyard. Did not know what materials they were burning but said that the smoke was coming into their house and making them very sick. They are concerned that chemically treated materials were being burned. Said that they called the fire department but nobody would come out. I told them to keep contacting the fire department, and that we would not put out the fire. Recommended that they also call the Jefferson County Division of Solid Waste and report potential solid waste burning.

**Comments** I visited the concern location on 5/6/21. I did not observe any signs of open burning from the public road. I knocked on the door but nobody answered. I left a Fact Sheet on Open Burning Regulations and a business card at the door. As of 5/17/21 I have not heard back from the concerned party or the property owner.

 On May 17th, I forwarded complaint by email to Jeremy Rogus of St. Louis County Health Dept APCP:  
 Subject: RE: Environmental Emergency Response Incident St. Louis County  
 This seems more of a potential meth lab thing, since a residential area.  
 Since anonymous, couldn't call to inform.  
 Thanks!

Tom Sims, Environmental Supervisor  
 Missouri Department of Natural Resources  
 St. Louis Regional Office  
 7545 S. Lindbergh Blvd., Ste. 210

 Office: 314-416-2960  
 Direct: 314-416-2477

Jeremy Rogus responded with the following by email:  
 Subject: RE: Environmental Emergency Response Incident St. Louis County

We have investigated this complaint thoroughly over the years. We have been to the location and smelled nothing. The resident should be considered dangerous. I have personally been there with a police escort. The police consider the resident to be dangerous. Police arrived with three cars and we were taking cover behind vehicles and around corners when I was out there. Do not go to this site, even with the police because they will stand behind you.

**Concern No.** 45731    **Concern Info** I understand that open burning is allowed in Missouri, and that each county enforces their own rules. can someone head rr in the right direction of rules for burning outside of city limits?  
I live in the country in Christian county and have a renter neighbor that burns LARGE piles of tree rubbish with trash cans c garbage thrown on top and occasionally a couch gets burned as well. they burn no matter the wind or weather and twice now, I have ash all in my yard.  
I'm just across the road from the nuisance and have had cancer once, so this concerns me for not only my welfare, but for the kids that live here as well.  
I'm wondering if this can be stopped, or do I just live with it?  
Thank you for the assistance you can provide  
Vicky Justen

**Comments** No violations. I arrived onsite with Wendell Hall and we found the burn pile in front of the yard of 205 Valley Vista. I photographed the burn pile and contacted the house. The resident of the house claims that the property is owned by Keith Mills whom he contacted. Mills is an asbestos inspector whom I met in my other inspection. The burn pile consists of vegetative waste. I can say that it is about 5 cubic yards total volume. However, it can also be seen that the burn pile did not burn successfully, probably since it is wet. I can estimate that the amount of materials burned is less than 1/2 cubic yard (Photo 1).  
Mills arrived and confirmed that the property is his. Mills also confirmed that they have cleared the lot there and have been burning brush there for a month now. I asked him about the burn pile. Mills told me that it was his and they came from the nearby property which belonged to his dad. Mills said that they have been burning vegetative waste for a while but mostly from the brush on that property.  
I cleared up with Mills that burning of vegetative waste is allowed as long as it came from within the property. According to open burning rules, vegetative waste is yard waste and they are allowed to be burned. Since only a very small amount of it was burned coming from outside, I only told Mills that he cannot burn there any trash that does not come from the property, moving forward. Mills agreed that the remaining trash will be sent to the dumpster. Also Mills informed me that the trash on his pile, which was not also burned did not come from him. I told Mills that it is classified as promiscuous dumping and will be his responsibility also. Mills said he will dispose of those accordingly also.  
We exited the site afterwards.

**Concern No. 45756** **Concern Info** Caller reports that a house on the corner of Hwy. O/CR 575 has a large quantity of waste (household/residential, furniture, car parts, etc.) on the property. According to the caller, the property owner has burned the waste several times as a means for disposal, but continues to add more waste. The caller also stated that the lighter bits of waste (bags, paper, wrappers, etc.) blow off of the property onto the surrounding properties when the wind picks up.

|------|-----------|-----------|-------------|------------------|--------------|----|--|--|

**Concern No. 45757** **Concern Info** Voice message left 4/18 @ 11:19 pm. Ed Love called for Camille Graves he lives at 4380 West Hwy 86 and Chris Green the neighbor next door is burning again at 11 pm at night when he thinks everyone is asleep. They even turned off all the lights act like no one was home. The Fire Department was called and he will probably get a citation this time as it is the third time. This is not wood that he is burning it is the same stuff. He was told to call if it happened again.?

**Comments** No violation. I first contacted the Redings Mill Fire Dept to see if they responded to the fire. I spoke with Steve Coats who said they arrived on scene and said it was unfounded. They said they had talked to Mr. Green on the previous call and told him what he could not burn in the future.

I then went to the property where I observed no open burning occurring. Chris Green is receiving a Letter of Warning from the Department regarding the open burning of regulated material as a result of the investigation of concerns 28931 and 28946 on April 8, 2021. That letter was mailed April 22, 2021 so he would not have received that letter at the time of the investigation.

The LOW activities will be tracked in other concern.

**Concern No.** 45876    **Concern Info** ?Open buring of trash including tire scrpas, metal, plastic, and other wastes. CP says that the smell is overwhelming and the smoke coming off of the property is extremely dark. CP also reported that they have spoke to Glennis Evans about the issue in the past. I asked the CP if they had reported the burning to the fire department and they said they hadn't but the local FD is all-volunteer and can be difficult to reach at times. According to the CP there is a trailer on the property full of trash that the CP believes they are going to burn in the near future.

|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 45878 **Concern Info** We have received several complaints/concerns regarding buildings within a "strip/row" that are falling in and the backside of buildings are falling into the Macks Creek, not to mention Bill's Tree Service who is also along this creek and has vehicle and mowers and such wash into and down the creek. There is so much solid waste on that property it cannot be good for the groundwater nor the creek.

We have been out regarding wastewater but have not found any issues there....as of yet.

The addresses in question are:

13059, 13061, 13069, 13073, 13075, 13077, 13079 & 13083 W US Highway 54, Macks Creek MO. (See attached). We visited with the owner's at Palasota's Place (restaurant) and they allowed for us to enter their building and go out behind to see the back sides of the buildings in question. The restaurant is in tact along with just a few other buildings. The building highlighted in blue on attachment are in question.

Who shall I report these environmental concerns too?? This is nothing new to us or MDNR. MDNR was involved several years ago due to the creek being compromised. Us as a county do not have much teeth in our rules as far as dilapidated buildings/trash/solid waste.

Any guidance you can give will be GREATLY appreciated

**Concern No.** 45912    **Concern Info** Caller states that dust from quarry is leaving the quarry. Caller thinks they have an issue at the "bag house" and may not be using filters. According to the caller, the dust has not been this bad for six years. Within the last month the dust has been an issue for at least the past month, possibly longer (January). The caller had one-quarter inch of dust on their truck, and had the house power washed one month ago (dust is covering the home again). The dust was very thick yesterday.

Caller has spoken to the quarry, but the problem continues. Last year the quarry removed trees on the northern border of the quarry area. Caller has noticed the dust in the afternoon (1:30-4:00), but is not at the property full-time.

Caller would like the investigator to make contact before going out.

**Comments** No violation.

|------|-----------|-----------|-------------------|-------------------------|---|----|

**Concern No.** 45954 **Concern Info** Charles Smallwood and Michael Smallwood, father and son respectively, have reportedly been burning illegal trade waste 361 2nd Street. The property is reportedly owned by Corsa LLC and is owner financing the property to the Smallwoods. They are reportedly 50 to 75 tires and a mobile home buried at the site, and regular burning of illegal waste. The Smallwoods typically wait to burn right before rain is in the forecast, and the concerned party believed they look for the opportunity for the rain to wash off the waste after it is burned. There are explosions that occur when the waste is burned. The fire usually smells like chemicals and plastic burning. Western Taney County Fire Department has reportedly been called to the location on more than one occasion and they have extinguished the fires.

The concerned party did not have a phone number for the Smallwoods.

**Concern No.** 46015 **Concern Info** From form: "Horrible odor coming from C&L Grease. I believe they have dumped burned off grease waste and the smell is making me physically sick!!!"

"

C&L grease is dumping hazardous material on his land on 5th street. We have complained to the city of Carterville about the smell for this but since the owner is on the city council they refuse to do anything about it. The smell has caused me to have many headaches and a upset stomach. I can't open my windows because it is horrible. Please something needs to be done. This is getting old!!!

|------|-----------|-----------|-----------------------|----------------------|--|----|

**Concern No.** 46079    **Concern Info** Neighbor of Garber Diesel automotive business states there has been a black "dust" (stated to be like an ash texture) occurring within the past few months- this dust is found in the carpet, bookshelves, desks, etc only in rooms that she opens windows to. CP explains that the material doesn't clean like dust- states it "clumps" when cleaned and turns dark in color. The windows that are opened occasionally faces the automotive business. CP explained the auto business uses a used oil burner and believes the "dust" to be coming from this business. CP asked about air quality testing for her home- I explained DNR does not conduct air sampling for residential and directed her to contact her county health department or use a company that can be found through an internet search.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

### April 16, 2021 and June 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46158 **Concern Info** Caller reports a neighbor to the south of his property has spread an unknown animal/human sludge onto their field, causing unbearable odor. Caller concerned about impact to their private water as well as impact to the watershed. Email provided shows what appears to be land application of a dark sludge material covering a field. Tankers that transport the waste have been parked at 14256 Farm Road 1095, Cassville.

|------|----------|--------------------|------------------|------------------------------|----|

**Concern No.** 46163 **Concern Info** I work at Able Manufacturing as a temp through Onin, on 2nd shift. It is a duty if 1st shift to change the filters in the paint booth routinely and I have noticed that this has never happened in the 3 months I've been working there. I have over 5 years experience in industrial painting so I started looking and noticed the smoke stack coming out of the paint booth was caked with paint. This prevents the fumes from escaping and the paint should never be making to the top of the smoke stack, out the building as the filters should be catching it. I talked to my lead and nothing was done so that is the reason for my report

**Comments** No violation.

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
|--------|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|

**Concern No.** 46175 **Concern Info** ?Several parties are gravel mining in Seligman and Big Sugar Creek. Caller says creek has doubled or tripled in size since mining has occurred. Caller mentioned several names (Tim Tillman, Junior, Garcia) and says the mining is occurring all along to the Barry County line (possibly to Pineville). Caller did not observe mining below water line, but mentioned that truck were wet.

Caller also alleges that the state had cleared trees (MODOT?) and the logs wound up in the creek. The logs were removed and burned with tires. Caller said the site is near the confluence of Seligman Creek and Washam Creek.
